

PURIFOG

BY UR FOG

**Fog Systems for Complete Disinfection
of ALL Environments**

Disinfectant

PURIFOG BIOTECT AV

PURIFOG BIOTECT AV is the premier disinfectant to be used with Purifog fogging systems. Kills virus, fungi and bacteria. Disinfects rooms and all surfaces in all enclosed environments.

PURIFOG BIOTECT AV is sprayed with Purifog Fogging Systems and is proven to disinfect any professional or domestic environment with a higher efficiency than a normal spray system. The minute size of the of the fog particles that are uniformly diffused in the air allows the fog to reach all cracks, corners and surfaces (even vertical).

Why Biotect AV?

PuriFog Biotect AV is the strongest version in the PuriFog range to help combat the present pandemic of COVID-19 and is strong enough to even disinfect all surfaces within a hospital, provides a deep clean and hygienises the air.

PuriFog Biotect AV must not be breathed in, therefore workspaces homes and vehicles must be vacant while PuriFog Biotect AV is emitting fog and whilst the fog is present.

Disinfectant certified to the following EN standards:

EN14476 Disinfectant of viruses and enveloped viruses

EN 1276 Tested on bacteria

EN13697 Tested on fungus

Veterinary:

EN1656 Tested on bacteria

EN1657 Tested on fungus

Advantages

- + Disinfects all environments (sanitary, public, food)
- + Leaves no residue after treatment
- + Sprayed into the air disinfecting all surfaces reaching any crack, corner and wall making the premises safe and usable in less than 2 hours
- + Can be used in food production and processing premises according HACCP
- + Easy to use, does not require any intervention or specialised operators
- + Recommended dilutions are non-corrosive
- + Can be activated at night and activated remotely
- + Disinfectant product with the highest yield: 1 G./M3
- + Exclusive and tested use with all Purifog fogging systems
- + Purifog Biotect AV disinfectant is dispensed using standard Purifog fogging systems
- + Fog is dry and does not wet objects, surfaces or materials (paper, electrics, wood, plastic, glass etc)

Preparation of fluid

PURIFOG Biotect base bag 950ml

Biotect AV disinfectant bottle 50ml

Tube with valve

Place the bag on horizontal surface

Unscrew and remove the cap from the bag

Pour all the disinfectant contained in the bottle into the bag

Insert the tube into the bag by placing the cap on the neck **WITHOUT** pressing and **WITHOUT** screwing the cap

Let out as much air as possible by gently pressing the bag from below, avoiding leakage of the liquid (there is no need to let out all the air)

Screw the cap taking care not to let any air in
